Your coffee blend can be offered with the certifications shown above.

LOOKING FOR A
COFFEE ROASTERY
100% POWERED BY
RENEWABLES?

ARVID NORDQUIST

Your Coffee. Our craft.

Our quality promise.

We source coffee from 15–20 origins and 30–35 different qualities through long-term, direct relationships. This broad sourcing footprint helps us secure consistent quality, stable supply and a diverse range of flavour profiles tailored to consumer demand.

Together with our Q-grader and experienced buying team, we help develop and test the right blend for your private label strategy in our new, internationally equipped quality lab. A dedicated project team ensures that expectations, timelines and quality requirements are met throughout the process.

Our fully integrated Probat roasting set-up allows precise control from bean reception, storage and blending through to roasting and packing. With SAP integrated across production, we ensure full product traceability. Our high-tech logistics organisation includes EDI, AI-based forecasting and integrated ERP systems.

We roast and pack coffee without the use of fossil fuels and operate modern gas purification systems. We are certified according to ISO 14001, FSSC 22000 and FDA quality standards, with IFS implementation planned by June 2027. We also offer flexible packing solutions to meet a wide range of private label needs.

“ To us quality is not only a matter of great taste. It means attention to details and a strong ID and flavour profile for all our products, every time. ”

The Head of Quality Control, Arvid Nordquist Roastery
